**LUMA**  
Professional LCD Monitor

# Comprehensive, Innovative, Reliable Line of Picture Monitors

Building on a long history as a leading supplier of high-definition technology products, Sony continues to offer professional monitors in a variety of types and sizes, suitable for a wide range of applications in the studio and in the field.

Now, incorporating innovative wider viewing angles\*<sup>1</sup>, the TRIMASTER EL™ OLED (organic light-emitting diode) picture monitors include the new A Series: the PVM-2541A (25-inch\*<sup>2</sup>) and PVM-1741A (17-inch\*<sup>3</sup>).

These two new monitors enable group monitoring – for example, video engineers or colorists can view the display properly from many different angles. This allows greater efficiency and improves quality during content creation.

There is more good news for the PVM-2541A and PVM-1741A. These PVM-41 Series monitors, along with LMD-41 Series monitors (the LMD-2341W, LMD-2041W, and LMD-1541W), are equipped with a variety of convenient professional features including new waveform capabilities, vector scope, closed caption display, and camera focus in color.

Two small monitors in the PVM / LMD-41 Series – the PVM-741 7-inch\*<sup>4</sup> OLED monitor and LMD-941W 9-inch\*<sup>5</sup> LCD monitor – also offer these new professional features in their compact bodies. And these small-size monitors are further upgraded with the addition of two 3G/HD-SDI interfaces. Moreover, the LMD-941W incorporates a full-HD resolution LCD panel, delivering superb crisp picture quality.

The PVM-X300 30-inch\*<sup>6</sup> true-4K (4096 x 2160 pixels) resolution LCD monitor also joins Sony's picture monitor lineup. This monitor is ideal for 4K previewing in onset and editing applications.

Designed for every professional need, it's time you experienced the immense value of Sony's new picture monitors.

\*<sup>1</sup> This improves color shift by half when compared with predecessor models. Sony's measurement. Results may differ between monitors.

\*<sup>2</sup> 623.4 mm viewable area, measured diagonally.

\*<sup>3</sup> 419.7 mm viewable area, measured diagonally.

\*<sup>4</sup> 188 mm viewable area, measured diagonally.

\*<sup>5</sup> 227 mm viewable area, measured diagonally.

\*<sup>6</sup> 767.5 mm viewable area, measured diagonally.

# Sony Picture Monitor Technology and Features

## Wide Viewing Angles

PVM-41 LMD-41 LMD-51 LMD-30/10

PVM-2541A and PVM-1741A monitors feature significantly improved viewing angles, reducing the color shift by half\* when compared with their predecessor models, offering the industry-leading wide viewing angles in the professional flat panel market.

LMD monitors incorporating IPS LCD panels offer stable images when viewed from various angles: both horizontally and vertically. This allows precise images to be clearly viewed from various positions and angles – a critical requirement in professional video monitoring – and makes these monitors suitable for group viewing.

\* Sony measured. Results may differ between monitors.

PVM-2541A with an OLED panel

## 10-bit Signal Processing

PVM-41 LMD-41 LMD-51 LMD-30/10

All PVM-41 Series and LMD Series monitors incorporate a 10-bit signal processing system to offer a smooth gray scale along CRT-like gamma.

8-bit (256-levels) image\*

10-bit (1024-levels) image\*

\* Simulated images

## ChromaTRU Color Processing

ChromaTRU  
LMD-41 LMD-51

For an extra level of color-reproduction accuracy, every LCD panel used in LMD-41 and LMD-51 Series monitors is precisely color calibrated at the factory, providing characteristics consistent with those of broadcast standards. Also white balance is maintained at a consistent color temperature throughout all gray scale levels. The ChromaTRU™ process reproduces consistent light output extremely close to that of a CRT.

## Wide Color Gamut and High-purity Deep Color Reproduction

PVM-41

TRIMASTER EL technology shows the largest color range of any Sony monitor ever offered. Color standards such as ITU-R BT.709, EBU, and SMPTE-C are displayed more accurately and, if desired, the OLED panel's native color gamut can be displayed. Sony's micro-cavity structure uses an optical resonance effect in combination with accurate color filters to calibrate and stabilize RGB color accuracy. This combination is also effective in reducing ambient light reflection, and consequently deep color reproduction can be achieved without degradation, particularly in bright environments.

PVM Series OLED monitors color gamut

## 3G-SDI Input

PVM-41 LMD-41 LMD-51

PVM-41, LMD-41 and LMD-51 Series monitors can accept 3G-SDI input.\* Sony's 3G-SDI interface is compliant with the SMPTE 425 standard, transmitting up to 4:2:2/10-bit 1080/50p and 1080/60p video data using one SDI cable.

\* The LMD-51 Series monitors require an optional BKM-250TG 3G-SDI input adaptor. No models support a dual-link HD-SDI interface.

PVM-41, LMD-41 Series interfaces

## I/P Mode Selection

PVM-41 LMD-41 LMD-51 LMD-30/10

The PVM and LMD Series monitors provide a variety of I/P modes so that users can select the most suitable mode for each purpose:

### INTRA-FIELD:\*1

This mode interpolates images within the field, and delivers naturally reproduced images and quick picture processing. This mode is available for 1920 x 1080 SDI signal input.

### INTER-FIELD:

This mode interpolates images between fields. This is used for picture quality precedence (e.g., to reduce the jagged effect on moving pictures).

### FIELD MERGE:\*2

This mode combines lines alternately in odd and even fields, regardless of picture movements. This is used for PsF (Progressive Segmented Frame) processing and still image monitoring.

### LINE DOUBLER:

This mode interpolates by repeating each line. This is used for editing and monitoring fast-moving images, and checking line flicker. The minimum processing time is less than one field (0.5 frames).

\*1 PVM-41 and LMD-41 Series only.

\*2 PVM-41, LMD-41, and LMD-51 Series only.

## Auto White Balance

PVM-41 LMD-41 LMD-51

The PVM-41, LMD-41, and LMD-51 Series monitors employ a software-based white balance calibration function, which is called "Monitor\_AutoWhiteAdjustment". Combined with a PC and commercially available calibration tools\*, this function enables simple adjustment of the monitor's white balance.

\* Konica Minolta CA-210, CA-310, CS-200, DK-Technologies PM5639/06, X-Rite i1 Pro/i1 Pro2, Photo Research PR-655/670, Klein K-10, and JETI specbos 1211.

"Monitor\_AutoWhiteAdjustment" GUI image

## External Remote Control Function

### Serial Remote

PVM-41 LMD-41 LMD-51

The PVM-41, LMD-41, and LMD-51 Series have an external remote control capability for input/output signal selection and adjustment of various items via an Ethernet (10BASE-T/100BASE-TX) connection. Up to 32 monitors and up to four control units can be connected via Ethernet connection and controlled remotely on the network. Also these monitors support some functions of the BKM-16R – an optional remote control unit for BVM-E/BVM-L/PVM-L Series monitors – such as the power on/off switch and the Input Select function.\*

\* PVM-41, LMD-41, and LMD-51 Series do not support all BKM-16R functions.

### Parallel Remote

LMD-41 LMD-51 LMD-30/10

All LMD monitors can be remotely controlled via their parallel remote 8-pin modular connector. Seven of each monitor's available functions can be assigned to the available connector pins, such as tally switching, marker switching, and input switching.

## A variety of marker settings

PVM-41 LMD-41 LMD-51 LMD-30/10

All PVM and LMD Series monitors can display a center marker, aspect markers, and safety area markers.

4:3 aspect marker image

16:9 aspect marker image

Safety area marker image

## Power-saving Mode

LMD-41 LMD-51

When no input signal is received for over a minute, the monitor goes into power-saving mode and consumes minimal power. This function prevents unnecessary electrical consumption.

### TRIMASTER EL – RGB 10-bit, Full HD

24.5" panel \*

16.5" panel \*

- Sony's unique Super Top Emission technology
- Deep black with wide dynamic range

- Quick response with virtually no motion blur
- Wide color gamut and accurate color reproduction

\* 623.4 mm, and 419.7 mm (respectively), measured diagonally.

### TRIMASTER EL – Self-emitting Display Device

TRIMASTER EL creates light by recombining an electron and a hole within certain organic materials. The process of emitting light is extremely efficient when compared to other technologies currently used for display.

Its organic materials react to the control of the electrical current immediately, and do not emit light in the absence of an electrical current. In this way, the OLED display panel features superb black performance and quick response to fast-motion pictures. In addition, Sony's OLED display panel delivers a wider color gamut.

### Super Top Emission Technology

Sony's Super Top Emission OLED panel is designed to deliver light emission with the TFT layer on the rear side of the panel. Therefore, the top emission structure offers more efficient light emission than is typical with bottom emission structures where TFT layers are placed on the front side of the panel, limiting the light-emission aperture.

This Super Top Emission technology has a micro-cavity structure which incorporates color filters. This cavity structure uses an optical resonance effect to enhance color purity and improve light-emission efficiency. In addition, the color filter of each RGB also enhances the color purity of emitted light, and reduces ambient light reflection.

Sony's Super Top Emission OLED panel is completely sealed by a glass substrate, and the electroluminescent layer is fully isolated from outside air and moisture. This contributes to stability and reliability.

## The TRIMASTER EL processor - Dedicated to eliciting full performance.

- Accurate signal processing across all signal levels
- Accurate gamma control
- Superb uniformity control

### ▲ Dedicated TRIMASTER EL Processor\*

The PVM Series of OLED monitors incorporate newly developed OLED-dedicated signal processors to elicit and maximize OLED panel performance. This technology allows these TRIMASTER EL monitors to provide the level of performance required for critical imaging. These processors accurately control gamma and uniformity, and deliver precision stability control.

\* The PVM-741 is equipped with a different processing technology (ChromaTRU).

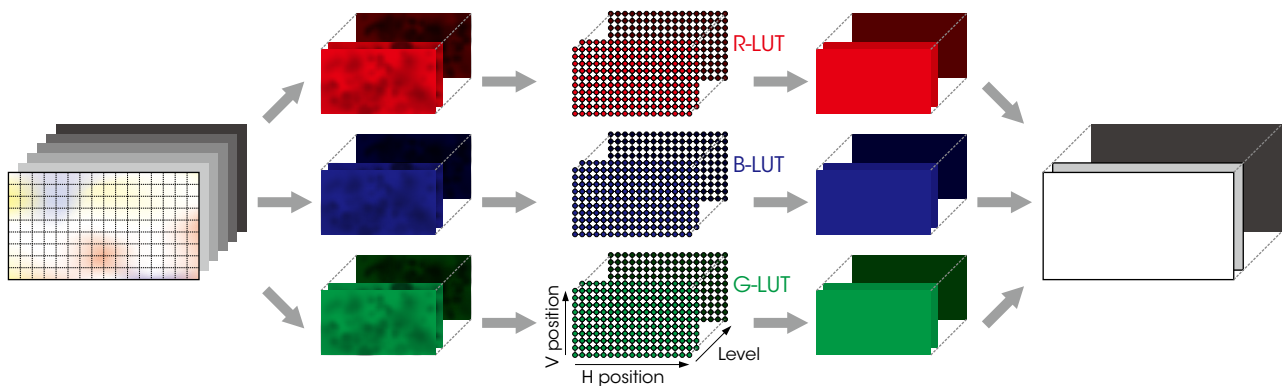

#### Accurate gamma control

Since TRIMASTER EL panel can display a deeper black than any other display device, the TRIMASTER EL processor controls gamma accuracy (black reproduction) by increased signal processing bit depth.

#### Superb uniformity control

TRIMASTER EL processor offers superb uniformity across all signal levels at every point of the screen. At the factory, OLED-panel uniformity is precisely measured and corrected using a proprietary RGB LUT (look-up table) adjustment system.

### ▲ Accurate Black Reproduction

A key advantage of TRIMASTER EL is the fact that each pixel can be turned completely off. No other display technology is able to offer this. LCD either raises black luminance due to intrinsic light leakage, or reduces black luminance with artificial local dimming technologies. CRT always applies a bias voltage to place the gun at the proper operating level. All of these display devices have some limitation in accuracy of black reproduction. In comparison, TRIMASTER EL is capable of reproducing accurate black with each individual pixel, enabling users to evaluate each picture image faithfully to the signal.

LCD\*

TRIMASTER EL\*

\* Simulated images

LCD

TRIMASTER EL

Gray scale images corresponding to the input signal

\* Gray scales are simulated images.

### ▲ Accurate Color Reproduction

Sony's Super Top Emission technology not only offers a wide color gamut with its purity of the three primary colors, but also maintains this wide color gamut throughout the entire luminance range. While all other display devices have limitations in reproducing accurate colors, especially in the low signal levels, TRIMASTER EL system is truly an ideal display device for picture evaluation. With OLED, users see the details in the blacks, and see the colors as well.

LCD\*

TRIMASTER EL\*

\* Color gamut images based on Sony's test results

### ▲ Quick Response with Virtually No Motion Blur

The TRIMASTER EL gray-to-gray switching speed (measured in microseconds,  $\mu$ s) is much faster than that of the LCD (measured in milliseconds, ms). \* This fast response benefits a variety of applications and uses. For example, in sports broadcasting, when camera pans would become blurred with an LCD, they remain sharp and clear with OLED. And with moving titles or graphics, when text can be difficult to read on an LCD, OLED displays clear text, regardless of speed or direction.

\* Sony's test results.

Wide viewing angle with an IPS panel

9" Full HD (1920 x 1080 pixels) resolution LCD panel (LMD-941W)

## ▲ Lightweight Compact Design – Flexible Mounting For Picture Monitoring

The PVM-2541A and PVM-1741A incorporate a lightweight, compact metal body. Their design offers flexibility, and can be adapted according to the application: a desktop unit with standard table feet, or used with an optional SU-561 stand, or without the stand for wall applications.

These monitors support VESA™ mounting with a 100 mm pitch, and EIA 19-inch standard racks. \* This allows the monitors to be used for all types of application – desktop editing, office viewing, on a studio monitor wall, or installed in OB vans.

\* The PVM-1741A only is available with standard rack-mount brackets.

LMD-41 only

### Slim bezel, compact design for monitor-wall Installation

Incorporating a lightweight and robust aluminum slim bezel and compact body, the LMD-2341W, LMD-2041W, and LMD-1541W are a highly appropriate solution for monitor-wall installation, both in studio sub-control rooms and OB vans.

## ▲ Easy-to-use Control Panel

A rotary-type switch and seven function-assignable buttons allow users quick and intuitive operation. Operation buttons with LED indicators enable error-free operation, even in dark environments. \*

\* LED lights can be switched on/off.

Control panel with LED lights-on

## ▲ Input Versatility

The PVM-41 and LMD-41 Series monitors are equipped with built-in standard input interfaces: 3G/HD/SD-SDI (x2), HDMI (HDCP) input (x1) and composite (x1).

## ▲ Desk-top editing and office viewing

With a standard-supplied monitor feet or by installing an optional monitor stand \*, the LMD-2341W, LMD-2041W, and LMD-1541W can be used as desk-top monitors both for editing and office viewing.

\* The optional SU-561 stand can be used for any 41 Series monitors, and the optional SU-562 stand is for the LMD-1541W only.

\* Simulated images  
\* The SU-561 and SU-562 monitor stands are optional

## ▲ Waveform Monitor and Vector Scope Display

An input signal's waveform and vector scope with an SDI-embedded 2-channel audio level meter can be displayed on screen. Both the waveform monitor and vector scope have various modes, including a zoom function (in an area of 0 to 20 IRE) with the waveform monitor, and a zoom function (in the central black area) with the vector scope, for adjusting white balance. The waveform of a specified line can also be displayed.

Waveform monitor

Vector scope

## ▲ Time Code Display

Time code embedded on SDI signals can be displayed on screen. Users can select either LTC or VITC.

\* Simulated image

## ▲ Camera Focus Function

The PVM-41 and LMD-41 Series monitors can control the aperture level of a video signal, and display images on the screen with sharpened edges to help camera focus operation. Further to this, the sharpened edges can be displayed in user-selectable colors (white, red, green, blue, and yellow) for more precise focusing. This camera focus function can even be enhanced when combined with native scan mode.

## ▲ Closed-caption Display

When inputting SD-SDI or HD-SDI signals, closed-caption signals of EIA/CEA-608 and EIA/CEA-708 are decoded and displayed on screen.

### In-monitor display (IMD) function

The LMD-2341W, LMD-2041W, LMD-1541W, and LMD-941W support the TSL UMD protocol and can display on screen two tally lamps and dynamic text information received via Ethernet. Up to 16 unicode characters\*<sup>1</sup> can be displayed. IMD text can be positioned at the top or bottom of the screen. Both the text color and the tally lamp color are separately selectable either in a commanded color or in one of eight preinstalled colors.\*<sup>2</sup>

\*<sup>1</sup> English alphabets, numbers, symbolic codes, and Japanese letters.

\*<sup>2</sup> White, red, green, blue, yellow, cyan, magenta, and amber.

The IMD, waveform monitor, 2-channel audio level meter, and time code display\*

The IMD, 8-channel audio level meter, and time code display.\*

\* Simulated images

### Ideal for CRT monitor replacement

The LMD-1541W and the PVM-14L2, Sony's most popular 14-inch 4:3 aspect CRT monitor, share almost the same viewable area height. The body of the LMD-1541W – which houses a 15.3-inch diagonal, 15:9 aspect screen – is 74.5 mm shorter in height and only 27.2 mm wider than the PVM-14L2 body. And with its space-saving design, the LMD-1541W can be installed effectively in small spaces.

Dimensions comparison between the LMD-1541W and PVM-14L2

### Scan mode selection

Scan size can be selected from normal scan (0%), over scan (5%), full scan, and native scan modes.\*

- The aspect ratio can be switched between 16:9 and 4:3 according to the input signal.

As a new function of the LMD-2041W and LMD-1541W, when a 1920 x 1080i or 1080p signal is input, the image frame of native scan can be shifted in five patterns: center, top-left, top-right, bottom-right, and bottom-left.

\* Full Scan and Native Scan modes work on specific signal formats.

## ▲ PVM / LMD-41 Series features

- Two 3G/HD/SD-SDI and an HDMI input interfaces
- Waveform monitor, Vector scope, Audio level meter, Time code, Closed caption display, Camera focus function
- Easy-to-use control panel

### ■ Robust, light-weight, and compact body

Incorporating a light-weight and compact aluminum-diecast body with a detachable AR-coated protection panel, this model is flexible enough to change style according to user requirements.

AR-coated protection panel

PVM-741 installed in the optional MB-531 19" mounting bracket with MB-532 mounting panel

### ■ Retractable Carrying Handle

A retractable carrying handle is provided as a supplied accessory, allowing users to carry these monitors anytime, anywhere.

PVM-741 with carrying handle

### ■ Easy Mounting into A Camera System

With 3/8-inch and 1/4-inch screw holes on its base, the PVM-741 and LMD-941W can be installed in a camera system. Also with the supplied arm-mount bracket fixed on the top, these monitors can be installed in a camera arm.

Rear and bottom

Arm-mount bracket is attached on the top

### ■ ENG Kit VF-510

For use in ENG and EFP field, the optional VF-510 ENG Kit provides a viewing hood, carrying handle, and connector protector.

## It's Time for 4K Don't Miss the Wave; Catch the PVM-X300 4K Monitor

Full-HD production has widely impacted the broadcast and video production industry, yet now another wave is forming – the 4K content creation wave. Its rise is rapid, and it looks set to dramatically change the content creation industry, especially digital cinema.

Seeing this wave develop, you may be looking around for a versatile, dependable 4K video monitor. You can catch one right now – a right-size, easy-to-use monitor for every element of the production workflow including 4K cinema production (onset monitoring, dailies, and editing), 4K live production (camera control and program preview) and real-time 4K presentation.

Sony is proud to introduce the PVM-X300, 30-inch\*<sup>1</sup> true 4K (4096 x 2160 pixels) resolution LCD video monitor, ideal for 4K previewing in onset and editing applications.

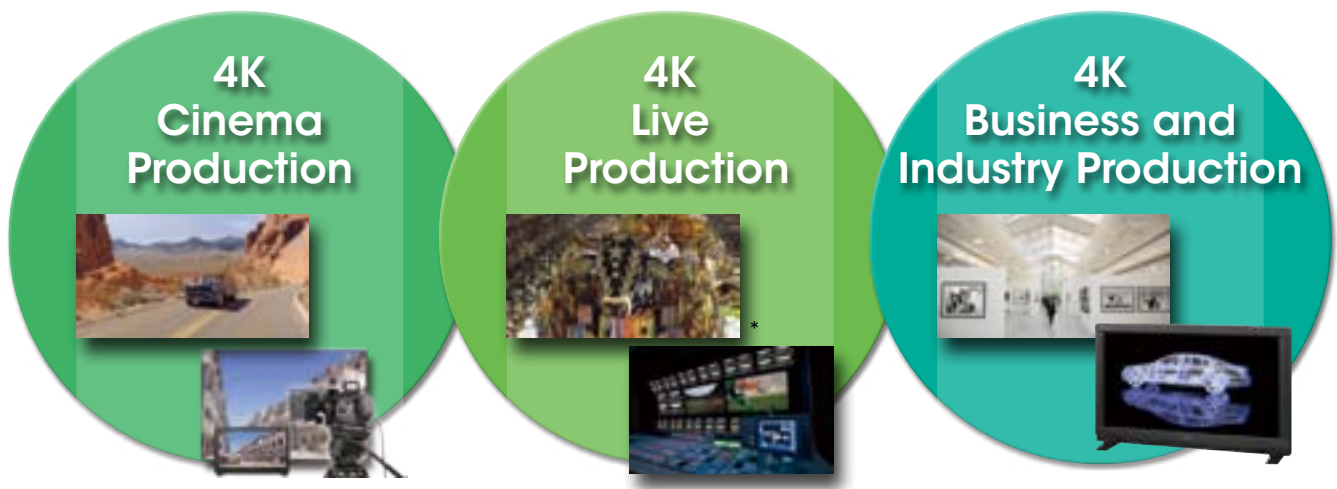

The PVM-X300 monitor realizes true 4K resolution in a portable 30-inch size. It's packed with features such as a wide-viewing-angle IPS LCD panel, and versatile input interfaces including 3G/HD-SDI x 4, HDMI x 4 and DisplayPort\*<sup>2</sup> x 2 inputs. In addition, it delivers a user-application-oriented monitor control system, and supports an optional 4K SxS player.\*<sup>2</sup>

Want to review immediately the 4K images from your camera without an external box, and would you like to free yourself from complicated wired connections? It's easy with an optional 4K SxS player. Combine the PVM-X300 4K video monitor with this player to achieve an integrated total workflow with Sony's PMW-F55 4K cameras.

Catch every advantage of the 4K wave not just in film and TV production, but also in a wide range of other applications. The PVM-X300 is also ideal in industrial design and visualization systems, computer graphics systems, and in museum and laboratory environments. Catch it now!

\*<sup>1</sup> 767.5 mm viewing area, measured diagonally.

\*<sup>2</sup> Supported by V1.1 or later.

\* Produced by TV Globo with the F65

## True 4K (4096 x 2160) Resolution Panel

The PVM-X300 incorporates a 30-inch wide-viewing-angle IPS LCD panel delivering true 4K (4096 x 2160) resolution. This new professional video monitor also incorporates a RGB 10-bit panel with uniformity control, and can accurately display the industry-standard ITU-R BT.709 color space.

With its convenient size, you can easily carry the PVM-X300 to an onset site to monitor 4K resolution motion pictures. You can also achieve 4K monitoring in postproduction by putting the PVM-X300 monitor on a desk in the edit suite. From acquisition to editing, you'll have a true 4K workflow all the way. Soon you'll be wondering how you ever managed without the PVM-X300 in your production and postproduction environments!

## Application images

## Versatile Input Interfaces

The PVM-X300 4K monitor is equipped with variable interfaces including 3G/HD-SDI x 4 and HDMI x 4, allowing a direct connection with any type of 4K cinema camera and live product.

### 3G/HD-SDI x 4 inputs

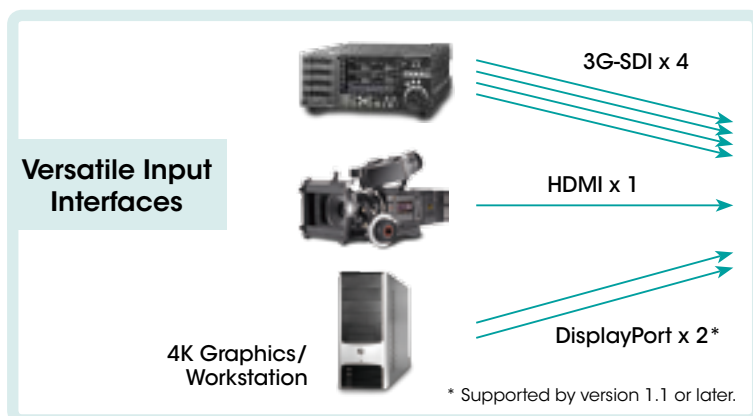

This monitor supports 3G-SDI receiving a wide range of 3G-SDI signals up to 4096 x 2160, 50p/60p, 10-bit Y/C<sub>B</sub>/C<sub>R</sub> 4:2:2.

### HDMI x 4 inputs

This monitor supports 4096 x 2160/24p and 3840 x 2160/24p, 25p, 30p\* with one single HDMI cable. The PVM-X300 is also equipped with a unique capability – it can display 4096 x 2160/60p video signals with one single HDMI cable when connected to Sony's new PMW-F55 4K camera system.

### DisplayPort\* x 2 inputs

\* Supported by V1.1 or later.

## 4K SxS Player\* (option)

You can combine the PVM-X300 with an optional 4K SxS player for easy playback of 4K content. Simply insert the newly developed SxS PRO+ high-speed memory media, which supports XAVC™ 4K and XAVC HD high-frame-rate recording, into the player to achieve immediate viewing of 4K camera images and 4K programs from a nonlinear editing system. This frees you from using an expensive, fragile HDD external player and complicated wired connections.

Thumbnails of each clip recorded on SxS PRO+ media are displayed on the monitor and can be controlled by the monitor's control panel.

\* Supported by V1.1 or later.

### SxS PRO+ Media

This is newly developed memory card for XAVC recording. XAVC is a scalable video format that supports HD, 2K, QFHD, and up to true 4K resolution. The XAVC 4K format provides exquisite 4K image quality in storage-efficient file sizes.

## User-application-oriented Monitor Control

The PVM-X300 4K monitor provides a diverse range of monitor control, allowing you to choose from a wide selection of control systems:

- Direct control with the monitor's control panel
- Indirect control via a BKM-16R optional monitor control unit in OB vans and studio-sub systems\*
- PC operation\* for general business and industry applications

\* Supported by V1.1 or later.

## Zoom Function\*

Each of the five divided areas of the screen can be magnified by scaling to full-screen size.

\* Supported by V1.1 or later.

## Camera Focus Function

The PVM-X300 can control the aperture level of a video signal, and display images on screen with sharpened edges to help camera focus operation. Further to this, the sharpened edges can be displayed in user-selectable colors (white, red, green, blue, and yellow) for more precise focusing.

Focus in red

Focus in green

## Marker Settings\*

This useful feature enables the PVM-X300 to display various markers including an aspect marker, safe area marker, and center marker.

\* Supported by V1.1 or later.

\*Simulated image

## Gamma Selection

The PVM-X300 supports Gamma 2.4 as specified by the ITU-R BT.1886. In addition, Gamma 2.2, 2.6, and S-Log2 can be selected.

## Robust and Lightweight Aluminum Body

A solid aluminum housing ensures durability, especially for outdoor usage.

## Auto White Adjustment\*<sup>1</sup>

The PVM-X300 4K monitor employs a software-based color temperature (white balance) calibration function, which is called "Monitor\_AutoWhiteAdjustment". Combined with a PC and commercially available color analyzers\*<sup>2</sup>, this function enables simple adjustment of the monitor's white balance.

\*<sup>1</sup> Supported with version 1.1 or later.

\*<sup>2</sup> Konica Minolta CA-210, CA-310, CS-200, DK-Technologies PM5639/06, X-Rite i1 Pro/i1 Pro2, Photo Research PR-655/670, Klein K-10, and JETI specbos 1211. A connector is required for each color analyzer.

## Other Convenient Features

- Audio: Stereo speakers, line out, and stereo headphone jack
- VESA mounting (200 x 100 mm pitch)
- Timecode display\*
- SDI-embedded 8-ch audio level meter display\*
- Chroma Up

\* Supported by V1.1 or later.

# LMD-51 Series – Versatile 3D/2D LCD Monitors

LMD-4251TD

LMD-2451TD

LMD-1751W

## Model Types

	LMD-4251TD 	LMD-2451TD 	LMD-1751W
Panel size (diagonal)	42-inch	24-inch	17-inch
Resolution (pixels)	1920 x 1080 (Full HD)	1920 x 1200 (WUXGA)	1280 x 768 (WXGA)
Aspect ratio	16:9	16:10	15:9
Desktop stand	N/A	Standard	Optional SU-561
EIA 19-inch rack-mount	N/A	N/A	Optional MB-530
VESA mounting (mm)	400 x 400	100 x 100	100 x 100, 75 x 75

- Stylish control panel design – sheet-type switches with on/off switchable LED lights
- Option slots for flexibility and expandability
- Multi-format inputs including 3G-SDI input\*<sup>1</sup>
- 3D display (LMD-4251TD and LMD-2451TD)
- 10-bit signal processing and ChromaTRU color processing technology
- Auto white balance calibration function for color consistency\*<sup>2</sup>
- Wide viewing angle with an IPS panel
- Sophisticated I/P conversion and I/P mode selection
- Waveform monitor, audio level meter, and time code display\*<sup>3</sup>
- External remote control function (serial remote and parallel remote)
- Power-saving mode

\*1 The optional BKM-250TG 3G-SDI input adaptor is required.

\*2 This function uses a PC and the commercially available calibration probes: Konica Minolta CA-210, CA-310, CS-200, DK-Technologies PM5639/06, X-Rite i1 Pro/i1 Pro2, Photo Research PR-655/670, Klein K-10, and JETI specbos 1211.

\*3 The LMD-4251TD does not support waveform monitor. Audio level meter and Time code can be displayed when the optional BKM-250TG input adaptor is installed and SDI signal is received.

## ▲ Superb Picture Performance and Convenient Features

### High-performance LCD panels

The LMD-51 Series monitors incorporate high-resolution professional LCD panels\* with an excellent wide viewing angle, and use precisely manufactured RGB color filters, allowing the reproduction of colors with stunning depth and saturation to create highly natural images.

\* LMD-4251TD (42-inches, 1920 x 1080 pixels), LMD-2451TD (24-inches, 1920 x 1200 pixels), and LMD-1751W (17-inches, 1280 x 768 pixels).

### 10-bit signal processing and ChromaTRU color matching technology

Added to the high-grade LCD panels, a 10-bit signal processing and ChromaTRU technology offer a smooth gray scale along CRT-like gamma and stable white balance.

### Waveform monitor, audio level meter, and time code display\*

The input signal's waveform can be displayed on screen. When an SDI interface is connected, the embedded audio level can be displayed on screen with a 2-channel audio level meter. Installing an optional BKM-250TG 3G-SDI input adaptor, the LMD-51 Series monitors can display on screen an 8-channel audio level meter and a time code – either LTC or VITC is selectable.

\* The LMD-4251TD does not support waveform monitor. Audio level meter and Time code can be displayed when the optional BKM-250TG input adaptor is installed and SDI signal is received.

\* Simulated images

### Stereo audio monitoring

LMD-51 Series monitors are equipped with stereo speakers (1.0 W + 1.0 W) and a stereo headphone jack, which enable users to monitor audio. The SDI-embedded audio can be monitored by the built-in speakers and the monitor output.

### Closed-caption decoder

The closed caption information embedded in EIA 608 and EIA 708\* can be decoded for display.

\* For EIA 708, the optional BKM-244CC Closed Caption Adaptor is required.

### Color temperature

Color temperatures of D93, D65, or a user preset value can be Selected.

### Selectable scan size for video input and aspect ratio

Scan size can be selected between Normal scan (0%), over Scan (5%), Full scan, and Native scan modes.\* The aspect ratio can be switched between 16:9 and 4:3 according to the input signal.

\* Full scan and native scan modes work on specific signal formats.

### Marker settings

LMD-51 Series monitors can display various area markers, including a center marker, aspect markers, and safety area marker. The brightness of these markers can be selected from three different levels: white, gray, and dark gray.

Users can also select either a black or gray mat to fill the outer area of the aspect markers. These flexible marker controls, together with the choice of many different aspect markers, make the LMD-51 Series monitors extremely convenient display devices for a variety of shooting scenarios, from standard video acquisition to digital cinematography.

### Marker settings

	16:9 Mode	4:3 Mode
Aspect Marker	4:3, 15:9, 14:9, 13:9, 1.85:1, 2.35:1, 1.85:1 & 4:3	16:9
Center Marker	Yes	
Safety Area	80%, 85%, 88%, 90%, 93%	

### Mounting flexibility

The LMD-1751W is rack-mountable in the EIA 19-inch standard rack, using an optional MB-530 mounting bracket.

### VESA mounting

LMD-51 Series monitors provide VESA standard mounting holes which support installation on a wall or ceiling:

LMD-4251TD – 400 x 400 mm pitch

LMD-2451TD – 100 x 100 mm pitch

LMD-1751W – 100 x 100 mm and 75 x 75 mm pitch

### Other features

- Multi-display mode
- H/V Delay Function
- ACC Off
- DC Operation
  - 24 V: LMD-2451TD, 12 V: LMD-1751W
- Setup Level for Analog Component and NTSC signal
- Sub Control on Contrast, Chroma, Phase, and Brightness
- Blue-Only Mode
- Monochrome Mode
- Auto Chroma / Phase Setup
- Three-color Tally (LMD-4251TD is not equipped with Tally)
- Key-inhibit function
- Smart APA (Auto Pixel Alignment) for Computer Input

## Input Versatility

### Standard and optional signal interfaces

In addition to the standard input interfaces of analog composite, component and RGB, and Y/C (S-Video), LMD-51 Series monitors are equipped with two slots for optional input adaptors of any combination for SD or HD video inputs. Users can expand the input capability according to their budget and needs.

### Computer signal interfaces

LMD-51 Series monitors are equipped with standard interfaces for HD-15 and DVI-D\* interfaces, respectively.

\* 1920 x 1080 images are down-converted for display on the LMD-1751W.

### 3G-SDI interface\*

LMD-51 Series monitors can accept 3G-SDI input by installing on an optional BKM-250TG 3G-SDI input adaptor.

Sony's 3G-SDI interface is compliant with the SMPTE 425 standard, transmitting up to 4:2:2/10-bit 1080/50p and 1080/60p video data using one SDI cable.

When an upgrade to these 1080/p systems is required, this single-link 3G-SDI system is an ideal, future-proof solution.

\* No models support a dualLink HD-SDI interface.

## Signal-interface Options

### BKM-250TG, 3G/HD/SD-SDI Input Adaptor\*

- 3G/HD/SD-SDI signal input (x2)
- 3G/HD/SD-SDI monitor output (x2)

\* 3G-SDI, HD-SDI and SD-SDI signals are detected automatically

### BKM-244CC, HD/SD-SDI Closed Caption Adaptor\*

- HD-SDI/SD-SDI signal input (x2)
- HD-SDI/SD-SDI monitor output (x1)

\* HD-SDI and SD-SDI signals are detected automatically  
\* Closed-caption decoders (EIA 608 and EIA 708) are equipped

### BKM-243HS, HD-SDI/SD-SDI Input Adaptor\*

- HD-SDI/SD-SDI signal input (x2)
- HD-SDI/SD-SDI monitor output (x1)

\* HD-SDI and SD-SDI signals are detected automatically

### BKM-229X, Analog Component Adaptor

- RGB, Y/Pb/Pr input (x1)
- EXT SYNC (x1)

### BKM-227W, NTSC/PAL Input Adaptor

- Composite input/output (x1)
- Y/C input/output (x1)

### BKM-220D, SD-SDI 4:2:2 Input Adaptor

- SD-SDI signal input (x2)
- SD-SDI monitor output (x1)

LMD-2451TD connector panel

LMD-1751W connector panel and option slots

LMD-4251TD connector panel and option slots

## 3D Features

Sony offers two models of high-performance professional 3D LCD monitor: the LMD-4251TD (42-inch<sup>\*1</sup>) and the LMD-2451TD (24-inch<sup>\*2</sup>). These monitors are supplied with the BKM-30G circular-polarizer 3D glasses as a supplied accessory.<sup>\*3</sup>

<sup>\*1</sup> 1067-mm viewing area, measured diagonally.

<sup>\*2</sup> 613-mm viewing area, measured diagonally.

<sup>\*3</sup> Also available BKM-31G clip-on type 3D glasses as an option.

### Circular-polarizer 3D system

The LMD-4251TD and LMD-2451TD incorporate a micropolarizer filter attached to the LCD panel. Wearing Sony's BKM-30G or BKM-31G 3D glasses, users experience smooth, uninterrupted viewing of multiple monitors and flicker-free 3D images. This image quality helps users to engage in 3D production operations with minimal stress.

### Unique lightweight circular-polarizer 3D glasses

Sony provides two types of 3D glasses: the standard BKM-30G, and the clip-on BKM-31G.

BKM-30G and BKM-31G circular-polarizer 3D glasses are optimized for LMD-4251TD and LMD-2451TD 3D monitors. These 3D glasses are extremely lightweight<sup>\*1</sup> and comfortable to wear. Designed with a soft frame and center-support structure, BKM-30G glasses fit any size and shape of head and face, so the wearer experiences minimal stress even during continuous production tasks. The center-support structure of the BKM-30G does not put the lenses under stress, and so there is no lens distortion. With clip-on BKM-31G 3D glasses, the wearer can simply flip up the lenses when not required.

Both the BKM-30G and BKM-31G block approximately 99% of the sun's ultraviolet rays.<sup>\*2</sup>

<sup>\*1</sup> BKM-30G glasses weigh approx. 18 g; BKM-31G glasses weigh approx. 16 g.

<sup>\*2</sup> These circular-polarizer glasses cannot be used as sunglasses.

The blocked spectral range is 280 nm to 380 nm.

### Fully compatible with 2D monitors

The LMD-4151TD and LMD-2451TD monitors are equipped with consistent quality, functionality, and operability – essential for professional monitors. Both 3D monitors can be used as 2D monitors, and their features are fully compatible with those of current LMD-51W Series monitors.<sup>\*</sup>

<sup>\*</sup> The LMD-4251TD does not support 2-channel audio level meter and waveform monitor display.

	A (typical)	B (typical)	C (typical)
LMD-2451TD	320 mm	54°	640 mm
LMD-4251TD	620 mm	46°	1240 mm

<sup>\*</sup> Clip-on BKM-31G glasses are worn with the user's own corrective glasses

### Multiple 3D input signal formats and interfaces

The LMD-4251TD and LMD-2451TD accept a variety of 3D signal formats including 3G-SDI, Dual-stream HD-SDI, HD-SDI side-by-side, HD-SDI Line interleave (line-by-line), HD-SDI Field sequential using an optional BKM-250TG 3G-SDI input adaptor, and DVI Line interleave (line-by-line). This input flexibility enables versatile 3D production both in the studio and the field.

### Various 3D signals and video formats support

Type of 3D signals	3G (level-B) Dual-stream	Side-by-side <sup>*3</sup>		Line-by-line		Sequential
	3G <sup>*1</sup> /HD-SDI x 2 <sup>*1</sup>	HD-SDI <sup>*1</sup>	HD-SDI <sup>*1</sup>	DVI	HD-SDI <sup>*1</sup>	
1080/50i	○	○	–	–	–	–
1080/60i <sup>*2</sup>	○	○	–	–	–	–
1080/24P	○	○	○	–	–	–
1080/25P	○	○	○	–	–	–
1080/30P <sup>*2</sup>	○	○	○	–	–	–
1080/50P	–	–	○	–	–	–
1080/60P	–	–	○	–	–	–
1080/24PsF <sup>*2</sup>	○	○	–	–	○	○
1080/25PsF	○	○	–	–	○	○
720/50P	○	○	○	–	–	–
720/60P <sup>*2</sup>	○	○	○	–	–	–
1920 x 1080/50Hz	–	–	–	○	–	–
1920 x 1080/60Hz	–	–	–	○	–	–

<sup>\*1</sup> BKM-250TG (Ser.7100001 or later) is required for the 3D 3G/HD-SDI signals.

<sup>\*2</sup> The frame rates are also compatible with 1/1.001.

<sup>\*3</sup> L/R pictures are displayed as "side-by-side" in 2D display mode, and are displayed as "line-by-line" in 3D display mode. The pictures are aligned as side by side in 2D display mode are not compressed vertically.

### Variety of 3D/2D display functions

There is a variety of convenient 3D production features<sup>\*1\*2</sup> – ideal for high-quality creative 3D production. These capabilities are assignable to function keys on the front panel of the LMD-4251TD and LMD-2451TD, and can also be assigned to an external remote control unit. Plus and minus menu switches (“+” and “-”) are also assignable to the parallel remote.<sup>\*3</sup> The 2D/3D select function is assigned to the front panel buttons or parallel remote, locations that are very convenient for users who frequently switch between 2D and 3D mode during 3D production work.

<sup>\*1</sup> These functions work when the optional BKM-250TG 3G-SDI input adaptor is installed. Some features are unavailable depending on input signals or display modes. Multiple functions may not be used simultaneously.

<sup>\*2</sup> The 1920 x 1080 image displays with black bands at the top and bottom of the LMD-2451TD WUXGA screen.

<sup>\*3</sup> This function will be available from V1.10, and requires a BKM-250TG serial number of 740001 or higher.

#### Disparity simulation [3D mode]

Either the left or right signal phase (or both phases) of a 3D image can be shifted horizontally.

#### Difference display\*

This function displays the difference between the luminance signal of the left (L) and right (R) images of the 3D signal. This function is useful for checking the amount of parallax.

#### Grid display\*

The primary function is to display arbitrary multiple numbers of vertical lines for users to review the overall parallax of captured images.

Examples of grid display

<sup>\*</sup> Number of vertical lines can be set variable with 0.1% (2-pixel) pitch.

#### Disparity ruler\*

This function works to precisely measure disparity by setting L-line and R-line to L/R objects respectively on the screen.

#### Virtual Subject Marker\*

This function simulates disparity in a subject on any part of the screen, before the shot is taken.

#### Checker board [2D mode]

Left and right input signals are displayed in a grid pattern on screen. By comparing adjacent images, users can recognize a difference in brightness and color setting of the left and right images.

#### L/R switch [2D mode]

Left and right signals can be swapped in a moment without inserting black frames, simply by manually pushing a function key. Automatic sequential mode is also available.<sup>\*</sup>

#### 3D/2D color matching function (3D offset adjustment)\*

In 3D mode, this function offsets the white balance of a 3D image. This enables closer image color matching between a 3D image viewed through 3D glasses and a 2D image when the viewer takes off their 3D glasses.

#### 720p Scan Mode Selection\*

With this resolution scan size (1280 x 720 pixels), users can choose either Normal or Native display mode. Normal mode enlarges the 720p image size to 1920 x 1080 pixel resolution.

720p Native display\*

720p Normal display\*

<sup>\*</sup> Screen images are simulated.

#### Side-by-side signals display

In addition to the popular squeezed side-by-side display (SBS1) mode, non-squeezed side-by-side display (SBS2) mode is also provided.<sup>\*</sup>

<sup>\*</sup> The SBS2 mode is available from V1.10.

#### Dual time code display [3D modes]\*

Left and right channels' individual time codes can be displayed on the screen.

Upper side display Lower side display

<sup>\*</sup> Time code displays and images are simulated.

#### Flip H [3D mode]

The Flip H function turns the reversed image to the normal view. This is helpful because the user can refer directly to the rig camera, achieving a simple and cost-saving system.

#### Horopter check [3D mode]

This function helps users to perceive the subtle difference of depth between different objects placed on the 3D screen surface.

Image overview when viewed from above

#### Payload ID display

This function allows users simply to check whether the left and right channels of 3D signals are connected correctly in the menu.

<sup>\*</sup> This function will be available from V1.10, and requires a BKM-250TG serial number of 740001 or higher.

## LMD-30/10 Series – Entry-level LCD Monitor

LMD-1530W

LMD-2110W

LMD-1510W

### Model Types

	LMD-1530W	LMD-2110W	LMD-1510W
Panel size (diagonal)	15.3-inch	21.5-inch	15.6-inch
Resolution (pixels)	1280 x 768 (WXGA)	1920 x 1080 (Full HD)	1366 x 768 (WXGA)
Aspect ratio	15:9	16:9	16:9
Desktop stand	Standard	Standard	Standard
EIA 19-inch rack-mount	Optional MB-533	Optional MB-529	Optional MB-535
VESA mounting (mm)	100 x 100	100 x 100	100 x 100

- High-purity color filters, and excellent brightness and contrast
- 109% peak white and 10-bit signal processing
- Color temperature and gamma selection
- Picture delay minimum mode (LINE DOUBLER)
- Versatile signal inputs including SDI\* and HDMI
- Marker setting including aspect markers, a center marker, and safety area markers

\* HD/SD-SDI input with the optional BKM-341HS HD/SD-SDI input adaptor.

### Full compatibility with professional HD equipment

### Easy connection with consumer products

## High Picture Performance

### High purity color filters

Equipped with high-purity RGB color filters, LMD-30/10 Series monitors achieve color reproduction with stunning depth and saturation.

### Excellent brightness and contrast

LMD-30/10 Series monitors provide high-brightness, high contrast images thanks to their wide aperture LCD panels. In addition, the use of precisely manufactured RGB color filters allows these monitors to reproduce colors with stunning depth and saturation – creating highly natural images.

### 109% peak white and 10-bit signal processing

Incorporating high-purity RGB color filters and 10-bit signal processing engine, LMD-30/10 Series monitors offer stunning 109% peak white reproduction without clipping and a smooth gray scale along CRT-like gamma.

### Color temperature/gamma selection

With the LMD-30/10 Series monitors, users can select from high, low, or preset color temperatures. A variety of gamma modes can also be selected.

Incorrect gamma image\*

Correct gamma image\*

\* Simulated images

### I/P mode selection

LMD-30/10 Series monitors provide two I/P modes so that users can select the most suitable mode for each purpose:

#### ■ INTER-FIELD:

This mode interpolates images between fields. This is used for picture quality precedence (e.g., to reduce the jagged effect on moving pictures).

#### ■ LINE DOUBLER:

This mode interpolates by repeating each line. This is used for editing and monitoring fast-moving images, and checking line flicker. The minimum processing time is less than one field (0.5 frames).

### Picture Delay Minimum

Audio is just as much a part of the show as video, and timing is always an issue. Picture Delay Minimum mode is selectable to minimize I/P conversion times for audio synchronization during editing. By selecting "LINE DOUBLER" in IP mode, the signal processing (I/P conversion) period is less than one field (0.5 frames).

## Operational Convenience

### Marker settings

LMD-30/10 Series monitors can display a center marker, aspect markers, and safety area markers in different sizes.\* The brightness of these markers can be set at different levels. These flexible marker settings make these monitors extremely convenient display devices for a variety of shooting scenarios.

\* 80%, 85%, 88%, 90%, or 93% can be selected.

### Selectable scan size for video input and aspect ratio

With LMD-30/10 Series monitors, the scan size can be selected: Normal (0%), Over (5%), and Full scan.

The aspect ratio can be switched between 16:9 and 4:3 according to the input signal.

### Three-color tally

LMD-30/10 Series monitors are equipped with a tally lamp that can be lit via a parallel remote connector. The status of the signal displayed on the monitor can be identified by the tally color: red, green, or amber.

### Monaural audio monitoring

LMD-30/10 Series monitors are equipped with a speaker (0.5 W), which enables the user to monitor audio.

### Protected controls

With LMD-30/10 Series monitors, the key-inhibit function helps prevent inadvertent operation from the control panel.

## ▲ Mounting Flexibility and Remote Access

### Mountable in an EIA 19-inch Standard Rack

LMD-30/10 Series monitors can be mounted in a EIA 19-inch standard rack using optional mounting brackets. The 7U-high LMD-1530W uses the MB-533 and LMD-1510W uses MB-535 respectively. The 9U-high LMD-2110W uses MB-529 Mounting Bracket.

### VESA mounting

VESA standard mounting holes (100 x 100 mm pitch) are provided on LMD-30/10 Series monitors to enable wall or ceiling installation.

### Parallel remote control

These entry-level type LMD-30/10 Series monitors can be controlled remotely via their parallel remote connectors. In the remote menu, there are 16 functions for the LMD-1530W and LMD-2110W, and 21 functions for the LMD-1510W, of which seven can be allocated to the remote connector.

## ▲ Input Versatility

### Standard inputs and expandability

LMD-30/10 Series monitors are equipped with a full range of analog SD inputs including analog composite NTSC and PAL, Y/C (S-Video), and 525i/625i component and RGB. These monitors can also handle HD/SD-SDI input with an optional BKM-341HS HD/SD-SDI input adaptor. This optional feature allows this monitor to connect to HD/SD-SDI equipment for wide range of broadcast and post-production applications. Furthermore, these monitors offer an HD signal input capability via their HDMI and analog component interface, and also can accept DVI signals via the HDMI interface.\*

\* Requires a DVI conversion cable.

720/60p*1	–	○	○*3	○*6

\*1 Compatible with 1/1.001 frame rates.

\*2 1080/24PsF, 25PsF, and 30PsF are displayed as 1080/48i, 50i, and 60i on the screen, respectively.

\*3 10-bit 4:4:4 Y/C<sub>B</sub>/C<sub>R</sub> and 4:4:4 RGB of 3G-SDI signals are supported.

\*4 10-bit 4:2:2 Y/C<sub>B</sub>/C<sub>R</sub> of 3G-SDI signal is supported.

\*5 10-bit 4:4:4 Y/C<sub>B</sub>/C<sub>R</sub> of 3G-SDI signal is supported.

\*6 PVM-2541A, PVM-1741A, LMD-2341W, LMD-2041W, and LMD-1541W can accept DVI signals via the HDMI interface using a conversion cable.

**PVM-2541A / PVM-1741A**  
**LMD-2341W / LMD-2041W / LMD-1541W DVI Input Signals**

Resolution	Dot clock (MHz)	fH (kHz)	fV (Hz)
640 x 480	25.175	31.5	60
1280 x 768	68.250	47.4	
1280 x 1024	108.000	64.0	
1360 x 768	85.500	47.7	
1440 x 900	88.750	55.5	
1680 x 1050	119.000	64.7	

• When a DVI signal is input to the HDMI IN connector using a DVI conversion cable.

• Sides of the displayed picture may be hidden depending on the input signal.

## PVM-X300 Signal Formats

### HD-SDI / 3G-SDI

Signal System	Signal Format	
HD-SDI Single-link	1920 x 1080/24PsF*	10 bit YCbCr 4:2:2
	1920 x 1080/24P*	
	1920 x 1080/25PsF

EIA 19-inch rack-mounting	–	–		Optional MB-530
VESA mounting	200 x 100 mm	400 x 400 mm	100 x 100 mm	100 x 100 mm 75 x 75 mm
Desktop stand	Monitor feet	–	Standard	Optional SU-561
DC operation	–	–	24 V	12 V
3D Features		LMD-4251TD	LMD-2451TD	
Micro-polarizer 3D filter		○		
Light-weight circular polarizer 3D glasses		Supplied BKM-30G (2 sets)		
3G-SDI level-B input*6		○		
Dual-stream HD-SDI input*6		○		
HD-SDI input*6		○		
DVI-D line-by-line input		○		
3D display functions*6		○		
2D/3D select		○		

\*1 DVI signals can be input via the HDMI interface using a conversion cable. \*2 Loop-through, automatic termination. \*3 This works with the combination of a PC and a commercially available calibration tools (Konica Minolta CA-210, CA-310, CS-200, DK-Technologies PM5639/06, X-Rite i1 Pro/i1 Pro2, Photo Research PR-670, Klein K-10, and JETI specbos 1211). \*4 With the LMD-4251TD and LMD-2451TD 3D monitors, the I/P mode is fixed to Field Merge mode on 3D mode. \*5 The 8-ch audio level meter can be displayed when the optional BKM-250TG input adaptor is installed. \*6 An optional BKM-250TG 3G-SDI input adaptor is required. \*7 LMD-1751W further support a full scan mode. The full scan and native scan modes work on specific signal formats. \*8 Supported by V1.1 or later.

Panel	a-Si TFT Active Matrix LCD		
Picture size (diagonal)	390.0 mm 15 3/8 inches	547.0 mm 21 5/8 inches	395.0 mm 15 5/8 inches
Effective picture size (H x V)	334.0 x 200.0 mm 13 1/4 x 7 7/8 inches	477.0 x 268.0 mm 18 7/8 x 10 5/8 inches	344.0 x 194.0 mm 13 5/8 x 7 3/4 inches
Resolution (H x V)	1280 x 768 pixels (WXGA)	1920 x 1080 pixels (Full HD)	1366 x 768 pixels (WXGA)
Aspect	15:9	16:9	
Colors	Approx. 16.7 million colors		
Viewing angle	89°/89°/89°/89° (typical) (up/down/left/right contrast > 10:1)	170°/160° (typical) (horizontal/vertical contrast > 10:1)	
Input			
Composite	BNC (x1), 1.0 Vp-p ±3 dB sync negative		
Y/C	Mini DIN 4-pin (x1) Y: 1.0 Vp-p ±3 dB sync negative C: 0.286 Vp-p ±3 dB (NTSC burst signal level), 0.3 Vp-p ±3 dB (PAL burst signal level)		
RGB, Component	BNC (x3) RGB: 0.7 Vp-p ±3 dB (Sync On Green, 0.3 Vp-p sync negative) Component: 0.7 Vp-p ±3 dB (75% chrominance standard color bar signal)		
HDMI	HDMI (x1) (HDCP correspondence)		
Audio	Phono jack (x2), -5 dBu 47 kilohms or higher OPTION AUDIO IN: Phono jack (x1), -5 dBu 47 kilohms or higher		
External sync	BNC (x1), 0.3 Vp-p to 4 Vp-p negative polarity binary		
Option in connector	D-sub 9-pin (x1), female		
Parallel remote	Modular connector 8-pin (x1) (pin-assignable)		
Output			
Composite	BNC (x1), loop-through, with 75 ohms automatic termination		
Y/C	Mini DIN 4-pin (x1), loop-through, with 75 ohms automatic termination		
RGB, Component	BNC (x3), loop-through, with 75 ohms automatic termination		
External sync	BNC (x1), loop-through, with 75 ohms automatic termination		
Audio monitor out	Phono jack (x2), loop-through		
Speaker (built-in)	0.5 W (mono)		
General			
Power requirements	AC 100 V to 240 V, 50/60 Hz, 1.0 A to 0.5 A	AC 100 V to 240 V, 50/60 Hz, 1.3 A to 0.6 A	AC 100 V to 240 V, 50/60 Hz, 0.7 A to 0.4 A
Power consumption	Approx. 50 W (max.)	Approx. 69 W (max.)	Approx. 40 W (max.)
Operating temperature	0°C to 35°C (32°F to 95°F) Recommended: 20°C to 30°C (68°F to 86°F)		
Operating humidity	30% to 85% (no condensation)		
Storage and transport temperature	-20°C to +60°C (-4°F to +140°F)		
Storage and transport humidity	0% to 90%		
Operating, storage, and transport pressure	700 hPa to 1060 hPa		
Dimensions (W x H x D) (with stand)	372.0 x 336.0 x 264.0 mm 14 3/4 x 13 1/4 x 10 1/2 inches	515.0 x 403.0 x 264.0 mm 20 3/8 x 15 7/8 x 10 1/2 inches	378.0 x 325.6 x 264.4 mm 15 x 12 7/8 x 10 1/2
Dimensions (W x H x D) (without stand)	372.0 x 288.0 x 100.0 mm 14 3/4 x 11 3/8 x 4 inches	515.0 x 355.0 x 86.0 mm 20 3/8 x 14 x 3 1/2 inches	378.0 x 280.6 x 90.0 mm 15 x 11 1/8 x 3 5/8
Mass	5.9 kg 13 lb	8.6 kg 18 lb 15 oz	5.8 kg 12 lb 13 oz
Mass (without stand)	4.2 kg 9 lb 4 oz	6.9 kg 14 lb 19 oz	4.1 kg 9 lb 6 oz
Supplied accessories	AC power cord (1), AC plug holder (1), Operating Instructions (1), CD-ROM (1), Using the CD-ROM Manual (1)		

# Optional Accessories

**BKM-250TG**  
3G/HD/SD-SDI Input Adaptor  
(for LMD-51 Series)

**BKM-244CC**  
HD/SD-SDI Closed Caption  
Adaptor  
(for LMD-51 Series)

**BKM-243HS**  
HD/SD-SDI Input Adaptor  
(for LMD-51 Series)

**BKM-220D**  
SD-SDI 4:2:2 Input Adaptor  
(for LMD-51 Series)

**BKM-229X**  
Analog Component Adaptor  
(for LMD-51 Series)

**BKM-227W**  
NTSC/PAL Input Adaptor  
(for LMD-51 Series)

**SU-561**  
Monitor Stand  
(for PVM-2541A, PVM-1741A,  
LMD-1751W, LMD-2341W,  
LMD-2041W, and LMD-1541W)

**SU-562**  
Monitor Stand  
(for LMD-1541W)

**MB-529**  
Mounting Bracket  
(for LMD-2110W)

**MB-530**  
Mounting Bracket  
(for LMD-1751W)

**MB-531**  
Mounting Bracket  
(for PVM-741 and LMD-941W)

**MB-532**  
Mounting Panel  
(for PVM-741 and LMD-941W)

**MB-534**  
Mounting Bracket  
(for LMD-1541W)

**VF-510**  
ENG Kit (Viewing Hood, Carrying  
Handle and Connector Protector)  
(for PVM-741 and LMD-941W)

**BKM-30G**  
3D Glasses  
(for LMD-4251TD and LMD-2451TD)

**BKM-31G**  
3D Glasses  
(for LMD-4251TD and LMD-2451TD)

**BKM-341HS**  
HD/SD-SDI Input Adaptor  
(for LMD-30/10 Series)

**MB-533**  
Mounting Bracket  
(for LMD-1530W)

**MB-535**  
Mounting Bracket  
(for LMD-1510W)

**BKM-XP1**  
4K SxS Player  
(for PVM-X300\*)  
\* Supported by V1.1 or later.
